Manado, Indonesia | 082195759381 | [bertlands.me](https://bertlands.me) | [gilbertorlands28@gmail.com](mailto:gilbertorlands28@gmail.com)

## Summary

---

A fresh graduate with a strong, well-rounded skill set in Full-Stack Development, Software Engineering, Artificial Intelligence, and UI/UX Design. Technical foundation includes backend routing, system architecture, and blueprint design across modern programming languages. Particular depth of interest in AI, with multiple software projects built involving AI integration, including practical experience implementing LLMs into real-world applications and building AI agents and keeping sight of the rapidly evolving modern technology. Fast learner, adapting quickly to new tools and environments, comfortable working with team and independently, or as a team lead role across a variety of work environments and project structures.

## Project Experience

---

### Pointera: Asisten Pointer berbasis Large Language Model untuk Ekstensi Browser Chromium

Research Project and Implementation (November 2025 – Mei 2026)

- Developed a Browser Extension and Web Dashboard system integrating Artificial Intelligence to reduce workflow friction, increase productivity, and surface insights for browser users, researchers, and students.
- Implemented Research & Development methodology, integrating top-tier LLM models (ChatGPT, Gemini, Claude) into the system for end-user deployment.
- Built an interactive "orb" feature and mini chatbox enabling users to get instant answers, brainstorm, or compare multiple browser tabs simultaneously for actionable insights.

### Lecrion

Enterprise Project (March 2026 – Present)

- Developed an integrated POS, cashier, and Chatbot system within a single unified platform, implementing AI for both customer service and business owner service.
- Implemented AI-driven intelligent analysis and summarization across business verticals (finance, commodities, F&B, building materials and more) for individual merchants.
- Built fraud detection features to address common risks in manual record-keeping, applying AI across every transaction, invoice, forecast, and financial insight designed to be user-friendly and tamper-resistant.

## Work Experience

---

### Central Pet Store Paal 2 – Intern (*Full-Time*)

June 2023 – July 2023

May 2024 – July 2024

## Education

---

### Universitas Klabat

S1 Ilmu Komputer (2022 – 2026)
